

## **E.T – A LOCAL WAY OF LEARNING**

**Title:** ALPHABET OBSERVATION HIKE

**Author:** Eulalie R. Rivera Elementary School Environmental Education Team

**Grade Level:** K-1

### **Concepts:**

2. Ecosystem

### **Disciplines:**

Language Arts

Arts

### **Objective:**

Along a given area, children will find different things whose names start (and/or end) with a letter of the alphabet and they will either, correctly say the name, check the alphabet box, and write the name in the box, or draw a picture of the thing in the box.

### **Rationale:**

Be learning the alphabet and relating it to things found in a natural area--which knows, but it might be the beginning of another Ranger Noble Samuel! Anyway, it could be fun and learning at the same time.

What can I find that begins with...

1. I will show it to the teacher and put a big "X" in the right box.
2. I will try to write the correct name in the box.
3. I will draw a small picture of it in the box.

### **Materials needed:**

Alphabet worksheet pencils or crayons.

(Pieces of cardboard or a large notebook could serve as a firm written surface).

### **Directions:**

Children will carry their alphabet worksheet, pencil or crayons with them while walking through the assigned area (playground if at school; beach, park, or on a field trip). When discovering an object whose name begins with a letter of the alphabet, the children will either write the name of the object or draw a picture of it in the appropriate box on the alphabet worksheet. Example--"I saw an ant!" (Name or picture goes in alphabet worksheet box "A"). A variation to help with difficult letters (X or Z) is to allow them to use names that end with such a letter.
