

Overview:

[St. Thomas](#)

[St. John](#)

[St. Croix](#)

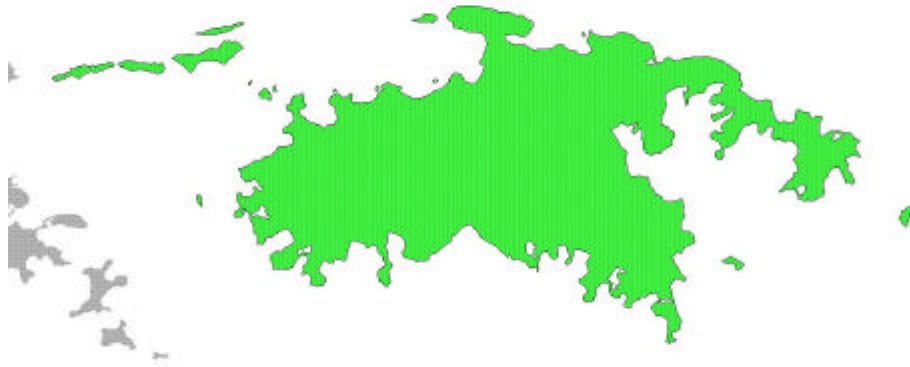

NOTE: All land area calculations are based on a **2000 Shoreline Vectorization Project of Puerto Rico and the U.S. Virgin Islands** by the National Oceanic Atmospheric Administration-National Ocean Service (<http://www.csc.noaa.gov/products/shorelines>).

The land area for St. Thomas (27.4 sq. miles) and the surrounding cays (4.1 sq. miles) equal approximately 31.5 square miles.

St. Thomas and Surrounding Cays Percent Land Area by CLWUP Districts

DISTRICT	PERCENT
District A: Agriculture	4.0%
District 1: Conservation	53.0%
District 2: Low Density	19.9%
District 3: Moderate Density	12.1%
District 4: High Density	7.1%
District 5: Urban	1.5%
District 6: Industrial	2.5%

The land area for St. John (19.2 sq. miles) and the surrounding cays (.2 sq. miles) equal approximately 19.4 square miles.

**St. John and Surrounding Cays Percent Land Area
by CLWUP Districts**

DISTRICT	PERCENT
District 1: Conservation	81.7%
District 2: Low Density	12.7%
District 3: Moderate Density	2.9%
District 4: High Density	2.6%
District 5: Urban	0.02%

The land area for St. Croix (83.6 sq. miles) and the surrounding cays (.4 sq. miles) equal approximately 84 square miles.

St. Croix and Surrounding Cays Percent Land Area by CLWUP Districts

DISTRICT	PERCENT
District A: Agriculture	16.8%
District 1: Conservation	28.6%
District 2: Low Density	20.2%
District 3: Moderate Density	17.3%
District 4: High Density	9.2%
District 5: Urban	0.4%
District 6: Industrial	7.6%
